

Polarized Patterns Rules

1. To start the game, rotate the discs and look through the film on each of them to find four numbers attached to the film. You should be facing the lightbulb when doing this.
2. Using the four numbers, enter a series of 4-digit passcodes into the keypad. The order of the numbers in each passcode is hinted at in the riddle provided. The game is finished if all of the passcodes are entered successfully.
3. When the game is finished, randomly rotate all of the discs to reset the game so it can be played again. The keypad device will automatically reset for the next playthrough.
